

Clark Forklift Part

Clark Forklift Parts - Performing globally, there are currently 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those operating in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 specific components fabricated for 20 unique brands of forklifts and automated equipment. Your regional Clark Dealer is your complete source for availability of all your components needs supplied by Clark Totalift.

Clark has a phenomenal Parts Distribution team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Globally, Clark has one of the most impressive supplier support networks. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the materials handling industry.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional dedication to safety is currently a standard feature on every lift truck.

Clark's recurrent effort to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the globe to be certified with the globally accepted quality standard ISO 9001 for each and every one of their production facilities. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any environmental restrictions, thus placing them in a dominant market position.

Clark has chosen the system of "Lean Production" at all of its assembly plants because this technique is extremely economical and permits minimal use of resources. Established to guarantee maximum efficiency, this system is intended to find and acknowledge the most efficient methods for production plant management. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to develop the efficiency and brilliance of their merchandise while minimizing costs. The new value engineering agenda combines modern product improvement and provides improved customer support and service within the industry.
