

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove set out on a cross country RV expedition. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road trip.

During their journey, John reacquainted himself with previous business connections along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a considerable market for a product that could swiftly and safely elevate people in the air to accomplish upkeep and other building services.

Upon returning from their travels, John established a partnership with two friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they created and sold the first JLG aerial work platform. The business incorporates some of the simple design essentials of that original lift into current models.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into various markets globally and develops new products to make certain customers are capable of being more effective and perform in the workplace within a safer environment.
