

## Aerial Work Platform

Aerial Work Platforms - There are numerous attachments meant for lift trucks that could be utilized to be able to help expand the functionality of your lift truck and allow you to pick up stuff, handle materials with out difficulty or to finish clean-up tasks.

A lot of the accessories are specially designed so as to fit on the blades themselves. Blade extensions for instance, are utilized if you require more fork length, which increases lifting capacity. Blade extensions come in lengths ranging from 48-120 inches. Rounded or triangular accessories are one more variety utilized whenever transporting rolled material so as to ensure it does not roll off of the traditional flat blades.

Lifting attachments could be pivoting and telescoping crane accessories. They come in various styles. These attachments are often meant for moving lumber, metal bars, poles or any sort of bulky objects. Additional attachments such as other kinds of hook plates and hooks are accessible so as to carry stuff utilizing a chain or sling. Magnetic lifters and slab lifters are other objects which could be used together with hook accessories. Slab lifters are specialized attachments which are utilized for picking up various materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which attach to your forklift to be able to make moving rolls of carpet easier. The attachment hooks onto the forklift's blades and has a pole which goes through the middle of the carpet roll.

There are many kinds of lift truck attachment designed for facility maintenance like for example snow blades. These industrial blades can be connected to front end loaders and meant for transferring materials like dirt, and mulch as well as snow. Other common cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers comprise a broom that the forklift forks connect onto for sweeping large spaces like warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris like on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up quick and simple.

Material spreaders are other attachments used on forklifts. These spreaders are useful for various applications like spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Another optional lifting attachment are work platforms. These can be used by lots of various companies everyday. Platforms may range in size from 36" x 36" to up to 60" x 60". Some models may be accessible and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location utilizing the forklift. Larger platform units have additional space for employees so as to bring tools and other necessary objects for the job. Normally work platforms are made of poly material or steel.
